## SECTION E - General Information for Publications and Forms

**6. Publications:** PDO and CARs are reminded, some publications are both electronic and paper. X distribution publications will not be placed on the VEPDL.

**7. Forms: Office Forms:** Forms Management (AFSPC CSS/SCSPF) has delegated the control office forms to the office of primary responsibility (OPR). The OPR may now design office forms using available software such as MS Word. However, only AFSPC CSS/SCSPF is authorized to have and use PerFormPRO and FormFlow

designer/startup software. Refer to AFI 37-160, Volume 8, *The Air Force Publications and Forms Management Program--Developing and Processing Forms*, for the management of these forms.

**8. Packaging of Forms on the AF Forms Web Page.** AF has begun packaging multi-page form files on their web site. These are the forms that have more than one page and are not under the same file name. Pay close attention when you click on the form; if it is a packaged form (.fpk) you will need to SAVE or DOWNLOAD the form to your computer (C:\FORMDATA), versus OPENING the form. After downloading the form:

- 8.1. Open FormFlow Filler
- 8.2. Open the package - FILE - OPEN - ".FPK"
- 8.3. Unpack the package - FILE - UNPACK PACKAGE
- 8.4. Page 1 will open automatically
- 8.5. Page 2 you will need to open from C:\FORMDATA

8.6. For more information and guidance on unpacking packages, check out the following on the AF web page, <http://midway.spacecom.af.mil/2letters/sc/css/scr/links2.htm>, FormFlow Filler Users Guide page 6-7, and Processing Electronic Forms, page 14.

**Note:** Create a C:\FORMDATA Folder on your "C" Drive. AF has begun designing all their forms with a default data file in the DBASE format with a designated path to "C:\FORMDATA\...(data file name)...." AFSPC is in the process of redesigning all their command forms with this "C:\FORMDATA\" default data file. This is an insurance feature for you, the user, so you won't lose your data. The insurance is only good if you have already created a "FORMDATA" folder on your "C" drive. We recommend that you create a FORMDATA folder on your "C" drive now.
